DETAILED ACTION

Application Status

1. Claims 1-16 are pending in the instant application.

Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 1-11, drawn to methods of producing desoxyepothilone, classified in class 435, subclass 76.
 - II. Claims 12-16, drawn to recombinant *S. cellulosum* host cells, classified in class 435, subclass 252.3.
3. The inventions are distinct, each from the other because of the following reasons:

Groups I and II are related because the host cells of Group II could be used in an alternate method of making epothilones D and C (desoxyepothilones). However, the claimed methods of Group I neither make nor use the host cells of Group II. Thus, Groups I and II are patentably distinct. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Election

4. A telephone call was made to Carolyn Favorito on September 3, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).

Conclusion

5. A complete response to the instant Office action must include an election of invention to be examined.
